

Introduce Yourself.

Good morning Sir/Madam,Hi I am {name},I was born and brought up in Kolkata.I am a hard working engineering graduate specialized in Electronics and Communication Engineering with an overall CGPA of {CGPA}.

Along with my degree I've completed Python training course from Ardent Training Institute and I'am also a self-taught developer of C and SQL.This technologies helped me develop my final year project which is called {PROJECT NAME}.It was during this project I discovered that I am a quick learner, team player and also a proficient leader in different scenarios.In the first 3 years of my college I've been a freelancer on {Tech} and that had helped me to earn some extra pocket money.I am also very fond of watching {sports} and I also love read {blogs/books}.Before pandemic I was also associated with a NGO{NON-GOVERMENTAL-ORGANIZATION}. During this time I also visited different Oldage homes,Orphanages and also participated in different tree plantation events.That was all about me,lastly I want to thank you for giving me the opportunity to interview for this position.

=====

Why IT company?

So Sir/Madam I want to join the IT industry because of two specific reasons that are firstly the IT industry is one of the most booming industry currently and software is something where the future is going as we all are switching from normal platform to an e-platform and I as a software developer want to be a part of this change. The another reason I want to join IT industry because since high school I was interested in electronic gadgets and how they work internally and that is the reason why I chose to pursue engineering in ECE field and when I got enrolled in college I came to learn about different programming languages and softwares and that's when I felt that yeah using those softwares to create products that everybody like us is going to use in their daily life excited me and that is the sole reason why I want to join the IT industry.

=====

Why WIPRO?

The company which was incorporated in 1945 by Mohamed Premji known as western india vegetable product limited latter abbriviated to wipro is a globally recognized business organization.It provides business solutions, employment,consultation,healthcare,and all-rounder business solutions and I think it is a place where I could learn a lot and enjoy many challenges and also get many opportunities for growth.I also appreciate that wipro believes it's employees are it's most important assests.It seems to have a great corporate culture,where employees are treated like family.It is also signified in their logo which stands for the Wipro Values, Employees, Clients & partners, and Communities.

=====

Why should I hire you?

For starters I have all the skills and experience listed in the job description,and I am confident and well-spoken person who can make immidiate impact on your company.It's not just my background but also my passion for the industry and willingness to learn new technologies that drives me to succeed,and henceforth I think I am well qualified for the position.

Bond=12 months
Compensation=75k rs.

=====

greatest strength and weakness
short term and long term goal.

My greatest strenght is I respect and value the culture of any place and I try to adapt it and I am full of gratitude and also filled with hunger for more knowledge, also I can adapt to any situation and can keep myself calm in stressed scenarios. also I have a very basic knowledge on several fields of IT even though I have never worked on them so I can say I'll be able to adapt faster than others in any field where my training is going to be so I am someone who is versatile.

My greatest weakness is I try to fill in for things that I am not supposed to do, like in the project I was doing all kinds of front end and writing functions but

sometimes I had to write parts of database because my team members pushed those duties on me and I couldn't say no to him.

My short term goal is to improve my communication skills even further and also improve my technical knowledge a lot and specialize in a specific field and get as much hands on experience as I can.

My long goal is to build a successful career in IT
